

Convert your air-conditioning system into a powerful air-sanitiser in just 15 minutes.

Blue Science utilises the disinfectant properties of UV-c light to convert an air-conditioning unit into a powerful air sanitiser. Warm and contaminated air is pulled in through the top of the unit, where it is then cooled via the unit's cooling coil.

BlueScience immerses the air around the cooling coil in UV-c light, sanitising it during the process. The cool air is then dispensed by the air-conditioning unit free of virus, bacteria, moulds and odours.

Standard LED Driver & 700mm UV-C LED Strip Kit

An easy retro-fit system for all existing air-conditioning units, to treat and protect the air, providing constant UV disinfection, every time it passes through the unit. This standard kit includes: LED Driver, 1m extension cable, 700mm UV-c 18 LED Strip, AC unit safety seal, Store front display sticker and installation guide.
