## Change of Dual LP/HP Switch

Due to continuous evaluation processes and improvement, the Saginomiya dual LP/HP switches as fitted to small & medium casing condensing unit models are being changed to a different model.

**Old Type: DYS-D306X1MC1A2104**

**New Type: DNS-D306XMQ020**

The switch functionality and features remain the same as do the switch mounting holes so the old style switch can be directly replaced with the new style switch as necessary.

The spare part number for the switch remains unchanged: N05380006

All other unit models are unaffected by this change.

If you have any questions on the above, please contact J & E Hall Product Support in Derby on 01332 253400.
